TODAY'S BEST INVESTMENT FOR SMALL SAVERS

NATIONAL SAVINGS CERTIFICATES

Available in three different series, maturing after 5, 7 and 12 years. The yield is 3%, 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity. Interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income.

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000 and two joint holders upto Rs. 50,000/-

Deposits accepted in multiples of Rs. 100 upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½% per ennum, free of income_tax and super-tax and which is not taken into account in assessing the total taxable income, is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay, Calcutta, Delhi and Madras and Branches of the Imperial Bank of India at other places transacting treasury business. Deposits are also accepted at all Treasuries in Part 'A' States at places where the Imperial Bank does not transact treasury business and at all Sub-Treasuries in Part 'A' States; also at Treasuries at Bhuj (Kutch), Imphai (Manipur) and Coorg-Mercara (Coorg).

31/2%

TEN-YEAR TREASURY SAVINGS DEPOSITS

For further information and/or rules governing these investments please write to the Provincial National Savings Officer of your State or the National Savings Commissioner, Gorton Castle, Simia-3.

[•] In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

Explanation of symbols used:—B.=Births; B.R.=Birth Rate; C.=Cholora; S.=Smallpor; P.=Plague; F.=Fevers; D.D.=Dysentery and Diarrhoea; R.D.=Respiratory Diseases; M.D.=Maternal Deaths; D.R.=Death Rates; I.D.=Infantife Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for week ending the 5th September, 1953, relate to 115 towns with an estimated population of 16,352 thousands. The total number of towns is 296 and their population is 36,140 thousands. Thus 39% of the total number of towns representing 45% of the total population is covered in this statement. The numbers of the births and deaths recorded in these towns were 12,565 and 57,09 representing birth and death rates of 40.0 and 18.1 per thousand of population respectively.

(A) States (Parte A & C).—The data here relate to 104 towns with an estimated population of 15,472 thousands. Information about Ajmer, Bihar, Madras and West Bengal could not be included. The total number of towns is 250 and their population is 30,790 thousands. Thus 42% of the total number of towns representing 50% of the total population is covered. The numbers of births and deather recorded in these towns were 12,255 and 5,524 representing birth and death rates of 41.2 and 18.6 per thousand of

population respectively. The table at the end gives the position by States.

At halpur and Yeotmal in Madhya Pradesh were the only towns which recorded high death rates of 60·4 and 69·8 per thousand of population respectively and these high death rates were mainly due to deaths from cholera and dysentery and diarrhoca.

(B) States (Part B).—The data here relate to 11 towns with an estimated population of 880 thousands. The total number of towns is 46 and their population is 5,350 thousands. Thus 24% of total number of towns representing 16% of total population is covered. The num ers of births and deaths recorded in these towns were 310 and 185 representing birth and death rates of 18 3 and 10.9 per thousand of population respectively.

No town recorded a high death rate of 50 or over $\mathbf{p}_{\theta T}$ thousand of population.
